To leverage my expertise in Java programming language and full stack development frameworks to contribute to the design, development, and deployment of innovative web applications. I aim to collaborate with cross-functional teams, employ best practices in software engineering, and continuously enhance my skills to deliver high-quality, scalable solutions that drive business success.

## Experience

### XML Operater Trainee

*TNQ Technologies pvt.ltd, Chennai 2021-2022*

- At this E-Publishing company, I work as an XML operator. We receive materials from authors in improper alignment. These materials undergo editing by specific departments such as copy editing and graphics, and we ultimately receive them in doc format.
- As an XML operator, my responsibilities include styling the authors' names, highlighting key points, ensuring proper alignment, and checking browser view compatibility.

### Quality Analyst Intern (Internship)

*Epikindifi software solutions, Bangalore 2022-2023*

- Collaborated with cross-functional teams to analyze user stories and refine acceptance criteria, ensuring alignment with business objectives.
- I monitor Jira for client requests, promptly resolving queries and updating backend systems using MongoDB.
- Developed and implemented **test plans, cases, and scripts** based on project requirements and design specifications.
- I am also responsible for configuring the project according to business requirements, and When creating automation testing scripts, I effectively utilize Java with **Selenium**, leveraging **object-oriented programming (OOP)** concepts to enhance automation efficiency.
